MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY STRUCTURE AND DEVELOPMENT

Due to the age of the Leather Footwear Industry and its links with the social structure, the organizational structure that has emerged is a very complex one containing within it elements of continuity with traditional structures of small scale industries, as well as those that represent a break with them evolving as a much more organized and large scale industry like your Company.

Small scale reservation has been in existence for the leather and leather products industry since 1967 when reservation was extended from the handloom and small power loom sector to a large number of industries where small scale is important. Post nineties there has been a gradual de-reservation and the entire leather sector is now 'de-licensed' and 'de-reserved', paving the way for expansion on modern lines with state-of-the-art machinery and equipment. De-reservation thus constituted a major aspect of the changed conceptualization of small scale thereby increasing the export potential of the industry as a whole.

India as it stands today is endowed with 10% of the world raw material and export constitutes about 2% of the world trade in the footwear segment. With the de-reservation of the footwear industry and incorporating state-of-the-art CAD systems, these industries will move towards attaining world class qualities and standards. The changing lifestyles coupled with the increasing affluence of consumers is likely to lead to enhanced demand in the domestic market and export demand is expected to grow in days to come due to improved quality and cost competitiveness. Standard shoe sole and Mould (India) limited being an established player having object to carry on the business in footwear, synthetic shoe sole, ladies heels and moulds and also to deal in dyes, acids, alkalies etc. will definitely gain from the emerging opportunities.

OPPORTUNITIES AND THREATS

The Indian economy continues to stride forward and the last couple of years have witnessed impressive economic growth with the GDP growing at the rate of 8-10%. Combined with the large opportunity from the huge domestic market and a burgeoning middle class, which is slated to grow ten times over the next fifteen years, the Indian economy presents great opportunities for business in India. It is expected that disposable income per capita will increase in India over the next few years.

With the rise in disposable and exposure in fashion trends, consumers today are on the lookout for footwear and accessories that are high on the fashion aspect, without compromising on quality. Upwardly mobile youth are spending more on shoes and thrust is on variety and international trends. Professional women are increasingly spending more on footwear and this creates a new opportunity in the market to expand. Standard Shoe enjoys a very strong brand positioning with consumers in the Indian market and is quick to evolve its products to meet the changing needs of today's customers. Today, the Company is all set to emerge as a vibrant lifestyle brand offering fashionable footwear to consumers at an affordable price.

Organized retailers in India are also facing a threat from 'non-specialist' retailers like apparel retailers diversifying into footwear and discount hypermarkets and retailers introducing and promoting their own brands at competitive prices. These non-specialist retailers are likely to grow their market shares by increasing the range of products offered, and shopping merchandizing space allocated to their own footwear. Your Company is prepared to meet these challenges by increasing the coverage open big stores, in best locations, shopping malls and developing aggressive product & pricing strategies to meet the expectation of the customers.
